

Using patented low VOC chemistry, Siebert Inc. is the leader in pre-soaked cleaning cloths for automatic blanket washing equipment. Siebert Inc. has developed a product that just simply cleans better, reducing usage, providing you with overall savings.

Advantages using Siebert pre-soaked cloth rolls:

- . Reduced cloth consumption by approximately 70%.
- . Eliminate the cost of blanket wash solvent by 100%.
- . Eliminate clogged spray nozzles and hoses.
- . Siebert Low VOC pre-soaked cloth cleans both UV/EB hybrid and conventional inks on blankets and back cylinders

Pre-Soaked Cleaning Cloths

SIEBERT ICS PRE-SOAKED CLEANING CLOTHS

Sheetfed Pre-Soaked Cleaning Cloths

Siebert Pre-Soaked Cloth rolls outperform competitive products because the patented cleaning fluid works better. The secret is cleaning the blanket with less fluid, requiring fewer wash cycles which means less cloth is required. As a bonus, the Siebert cleaning fluid also leaves the printing blanket smooth and ink receptive, reducing blanket piling and producing faster start-ups. The unique lubricating properties of the cleaning fluid eliminate problems associated with cloth linting.

Siebert Pre-Soaked Cloth rolls are made from the highest quality DuPont Sontara® fabrics.

Web Pre-Soaked Cleaning Cloths

"Heavyweight" web fabric is designed to have superior tensile strength and maximum absorption properties. This allows the fabric to hold the highest amount of cleaning fluid and remove maximum ink and paper residue from the printing blanket.

"Textured Heavyweight" web fabric has similar tensile strength but allows approximately 40%- 50% additional cloth yardage to be wound on each roll. Because it has a textured finish, this cloth helps "scrub" blanket surface without damaging it. The cost per square yard for this fabric is slightly higher, but the additional yardage per roll generates real cost savings by increasing the number of washes per roll and reducing down time to change rolls.

Advantages using Siebert pre-soaked cloth rolls:

- Reduced cloth consumption by approximately 70%.
- Eliminate the cost of blanket wash solvent by 100%.
- Eliminate odors related to hazardous blanket wash chemistry resulting in a cleaner and safer working environment for customers and employees.
 - Eliminate clogged spray nozzles and hoses.
- Siebert LowVOC pre-soaked cloth cleans both UV/EB hybrid and conventional inks on blankets and back cylinders.
- Many of the Siebert cleaning cloth rolls can be manufactured using water-emulsified cleaning technology to help remove paper lint and salt residue.

Blanket Washer Solutions & Service

Pressroom Systems & Solutions, Inc. has parts for OEM design and has developed a more operator friendly rebuild that employs "Plug-and-Run" parts with kits available for routine on-site maintenance by your own staff or we can service your blanket washers, providing heavy duty parts and routine maintenance. Pressroom Systems & Solutions also provide operator friendly PLC upgrades.

Pressroom Systems & Solutions has also developed an innovative solution with their durable KBW Adapters for existing Komori automatic blanket washers. These adapters provide a quick and easy transition from dry cloth/solvent spray to Siebert No VOC pre-soaked cloth rolls
