

Powerful and Effective Anilox Roll Cleaner

Patriot Anilox Cleaner

Deep Cleaning Patriot Anilox Roller Cleaner is a high efficiency, high viscosity cleaner that clings to the surface of the roller without dripping off. Our Anilox cleaner is effective on all inks and coatings; water, solvent, UV, for gravure and flexo, as well as acrylics and UV coatings for offset and sheet-fed coating tower anilox rollers.

Anilox cleanliness is critical because dirty or clogged cells can degrade performance by reducing cell volume and causing uneven appearance or random pattern in the print.

Benefits of regular cleaning:

Improved Print Consistency

Plugged cells on your Anilox have a direct impact on the print quality. Regular maintenance program will ensure print consistency.

Money savings

Regular maintenance of Anilox will reduce the need of refurbishing or costly replacement.

Reduce downtime

Clean anilox cells keeps you running

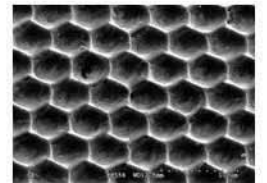

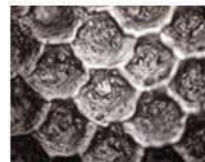

Dissolves Ink On Contact

Use Daily On:

Ceramic and Chrome Anilox Rollers

Laser and Steel Engraved Anilox Rollers

Removes Deeply Embedded Ink From Every Cell
